

**8th Workshop on Functional Analysis and its Applications
in Mathematical Physics and Optimal Control
September 5–10, 2011, Nemecká, Slovak Republic.**

Programme Committee:

Igor Bock	Slovak University of Technology, Bratislava
Vilmos Komornik	Université de Strasbourg I
Janko Bračič	University of Ljubljana
Vladimír Müller	Mathematical Institute, Czech Academy of Sciences, Prague
Marek Ptak	University of Agriculture, Kraków
Boris Rudolf	Slovak University of Technology, Bratislava
Zoltán Sebestyén	Eötvös University, Budapest
Michal Zajac	Slovak University of Technology, Bratislava
Jaroslav Zemánek	Mathematical Institute, Polish Academy of Sciences, Warsaw

PREFACE

These proceedings contain the contributions presented at the 8th Workshop on Functional Analysis and its Applications in Mathematical Physics and Optimal Control. The papers were evaluated and accepted by members of Programme Committee.

Functional analysis is one of the basic tools for solving differential and integral equations, optimal control problems and their numerical analysis. The aim of the Workshop is to bring together mathematicians mainly from Central Europe working in these fields. We hope that Central Slovakia with its nice mountains will be inspirational for interesting discussions. The previous workshops inspired fruitful cooperation of researchers. We are happy to meet you in Nemecká again.

Igor Bock and Michal Zajac, organizers
